PROFILE

I recently graduated from the University of Miami School of Architecture and I am excited to contribute my skills and knowledge to your esteemed organization.

Throughout the academic journey, I have developed a strong passion for architecture and design, and I am now eager to embark on a professional career where I can channel my creativity and problem-solving abilities. The five years of school equipped me with a solid foundation in architectural principles and sustainable design practices. While pursuing my degree, I was exposed to residential, commercial, institutional, and open public spaces projects with different heights from one story to one hundred plus story buildings.

I also discovered a passion and dedication to sustainable and inclusive designs. My goal in every project I've worked on is to integrate environmentally conscious practices in order to create sustainable and functional spaces that have a positive impact on communities and the environment. I am a highly motivated and detail-oriented individual who's committed to deliver exceptional results and pays close attention to details.

I firmly believe that my blend of technical skills, creative mindset, and commitment positions me as a good candidate for an architectural designer, and eventually an architect.
